

Hot Grass & Hot Vines

Hot Grass creates a natural looking electric fence. Individual grass units (or "clumps") hook to one another to form a continuous, meandering barrier to protect trees and plant beds from overzealous animals. Hot Vines look like natural vines but have "hot" electrified elements every 9" along the trunk. Hot Grass & Hot Vines are energized by off-the-shelf electric fence chargers.

Our Econo Hot Grass is suitable for most animals (lions, tigers, bears, etc.). For larger animals, like giraffes, elephants and large hoofstock, use our Tall Hot Grass. Hot Vines can be used on trees, walls, columns or rockwork.
