

Install Hot Vines
On Walls or Rockwork

"Hot" Tentacle
(Every 9")

Hot Vines

Hot Vines look like natural vines but have "hot" electrified elements every 9" along the trunk. Hot Vines are energized by off-the-shelf electric fence chargers (sold separately). Hot Vines are suitable for most animals and can be used on trees, walls, columns or rockwork.

For special cases (orangutans, otters) see our Custom Hot Vines.
